

My station is a small AM with a Christian format. Any program that would violate the standards of speech as proscribed by the FCC would not be aired on our station to begin with. To require our station to record all programs aired would impose a burden which we could not bear. This proposal would require additional equipment which our station can not afford to purchase. A larger operation might not have a problem with this proposal but we view this regulation as very costly and of little benefit to our listening audience. We therefore respectfully request that this regulation not be enacted.
